

Interstate Movement Requirements for Livestock and Other Warm-Blooded Animals from New World Screwworm Affected States

Please see the additional entry requirements for livestock and other warm-blooded animals entering New Mexico, and please promptly share with the practicing veterinarians in your state.

From the Infested Zone (IZ):

- All requirements to leave the IZ must be met for the state of origin.
- The interstate certificate of veterinary inspection (ICVI) is valid for 5 days from the date of inspection. Extended equine CVIs are not allowed from an IZ.
- Any NWS treatment or preventative that was administered must be documented on the ICVI. Include date and route of administration.
- The following statement is required on the movement certificate or ICVI: "All animals were inspected and found free of evidence of NWS infestation."
- Meet all standard NM entry requirements based on species/classification. **An entry permit must be obtained for all livestock.**

Movements to slaughter from within the IZ:

- All requirements to leave the IZ must be met for the state of origin.
- The ICVI is valid for 3 days from the date of inspection. **All animals must be slaughtered within 72 hours of inspection date.**
- No NWS preventative, treatment, or pesticide products are required.
- The following statement is required on the movement certificate or ICVI: "All animals were inspected and found free of evidence of NWS infestation."
- **An entry permit must be obtained for all livestock.**

From outside the IZ:

- The ICVI is valid for 30 days from the date of inspection. Extended equine CVIs are not allowed from a state with an infested zone.
- The following statement is required on the ICVI, "All animals on this certificate did NOT originate from an infested zone and have been inspected and found free of NWS infestation."
- Meet all standard NM entry requirements based on species/classification. **An entry permit must be obtained for all livestock.**

Please let us know if you have any additional questions. Thank you for all you are doing to continue preventing the spread of NWS!
